# Founder's Message

Hello

Hello and greetings to all our clients for the season of celebration that begins from September. It is time for cheer and joy across the country and the market too continues to be in a cheerful mood.

Many new people continue to be attracted to the market as it churns out returns for those who play it intelligently. Many of these people come with goals of making money. We need to understand that goals are for people who care about winning once. The real deal about the market however is to win repeatedly. And for this a system, rather than goals, is what is needed.

And Neotrader is indeed such a system! What does Neotrader do? Three things for sure. It helps make you money. It saves you time. It reduces your effort greatly.

In short, Neotrader is the system that you really need to win repeatedly. One thing all of us are short of is Time. We are also unable to keep up

the great amount of effort needed to stay atop the market on a continuous basis. By taking care of these two important elements, Neotrader enables you to focus completely on making money.

Many who have come to the market are prepared to work hard. Success in the market also has an element of luck. By using services from our stables (Neotrader, Training, Advisory), the hard work part is greatly reduced. You are also made a lot more efficient too. When you combine good luck with that the benefits will be great.

Occasionally, bad luck will also strike. But your high efficiency created by your association with us will enable you to ride out those difficulties with ease.

We are constantly creating, upgrading our offerings to our clients. Don't miss out on any of these. Make sure to interact with our support staff who are standing by all the time to assist you in your journey towards success in the markets.

Season's greetings, once again!

Dr. C.K.Narayan

## HOW GOOD ARE YOU?

**How  
Good  
Are You?**

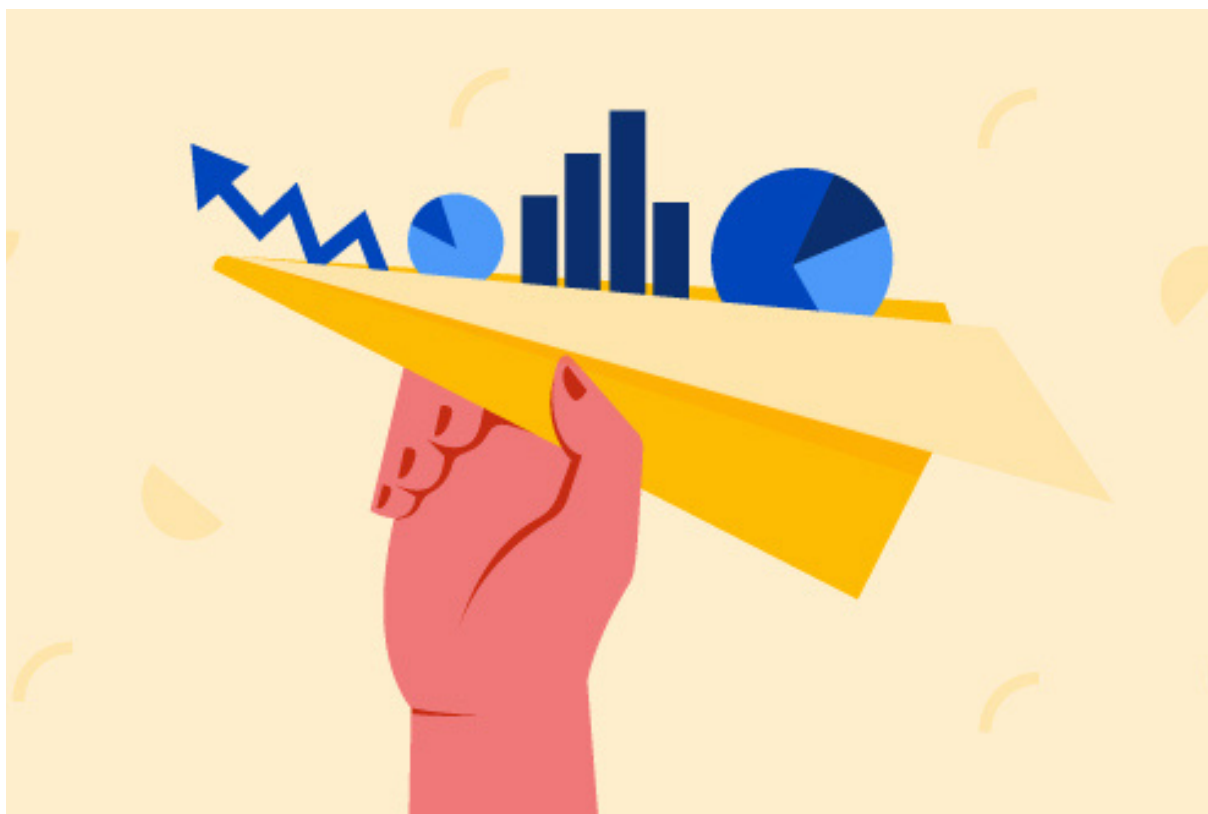

The difference between those who have entered the market recently (last 1-2 years) and those who have been around for long, is the expectation of how they will make money. Newbies expect to make money every day in the market. Theoretically, you can- because new opportunities show up every day. So, newbies keep looking at the all the stocks that are moving, looking for ways to get into them, regretting the ones they missed and bewailing the ones that they did get into (because they may not be performing). # NEW RATIOS FOR MEASURING OURSELVES

All market men are familiar with acronyms like ROE (Return on equity) or ROCE (return on capital employed) and fundamentally oriented analysts and investors look closely at these two metrics when they pick and hold their stocks. These are decent indicators telling us about the health of the company and the performance of the business. Their own success, for investors, is decided more by how well their portfolio has grown over the years. And the bigger investors or funds or PMS schemes etc. prefer to speak in terms of CAGR (compounded annual growth rate). To Read More...

Good 3 days of training. Learned a number of concepts and trading strategies over the first 2 days. The ICE trading philosophy was particularly systematic approach. Now look forward to the decision support systems that can be provided by Neo Trader software.

However, the live trading session was slightly different from my expectations / working style. Rather than identifying stocks while the market is in session, I personally prefer to pre-identify them before market opens and then take a trade if criteria meets

I would highly recommend the course to other new traders in the market. The way in which they explain the process is very unique. Also, the live market trading session is very good to correlate the learnings over the weekend.

Attended SMM Session of 3 days. Had an insightful session with Mr. Raja Venkatraman. I have been following him on ET prime Sector analysis for few months now and I have found him really good at sharing the knowledge. It was a productive session in understanding few indicators which can be used for intraday and multiday trading in equities and F&O. The notes shares are precise and covers the basics. I have also been following their videos on YT, which I have found useful to learn furthermore, especially the video by MR. CK Narayan where he suggests few books to learn more about technical analysis in depth and in what sequence we can pick to read.  
All in all these were the factors which led me to attend these sessions and I can say, it has been definitely useful...  
Will be utilising the strategies learnt from Mr. Raja in my future trading sessions.

It was very good 3 days learning sessions. lot of information we have received and some good intraday strategies. Teaching by Raja Sir was very extensive and in detail!! now we hope we will get a good support and hands on neotrader software to identify the trades using these strategies! Thank you very much Raja Sir!! for your efforts to train us(specially 5\*\*\*\*\* rating for your teaching techniques ), we will definitely use this in our trading!! ( I have already subscribed for annual membership) no word for Raja Sir teaching very well

# What's New in NeoTrader?

## RSI Breakouts & RSI Turn

We proudly present to you the brand new RSI breakout feature.

This will enable you to identify those stocks that are breaking above or below the bullish/bearish RSI levels. This is very useful to find out high momentum stocks and it can be seen across all time frames starting from 30min and going all the way to Monthly. You can find it on the RSI Trends Page.

The screenshot shows the RSI Breakouts & RSI Turn interface. At the top, there are controls for the stock symbol (NIFTYFNO), the timeframe (30MIN), and an Auto Refresh button. Below these are four panels: 'Turn up', 'Turn down', 'Break out', and 'Break down'. The 'Turn down' panel shows ADANIPTS with a red bar and 5 circles. The 'Break out' panel shows KOTAKBANK and IDFC with green bars and 5 circles.

We also have Programmed RSI Turn up and Turn Down Signals in the same page. This is particularly useful in identifying reversal trades.

The screenshot shows the RSI Breakouts & RSI Turn interface with a table of stock data. The table has columns for SYMBOL, TIMEFRAME, RSI, TURN UP, TURN DOWN, BREAKOUT, and BREAKDOWN. The table is filtered for NIFTYFNO and 30MIN. The table shows data for ADANIPTS, APOLLOHOSP, ASIANPAINT, and AXISBANK.

SYMBOL	TIMEFRAME	RSI	TURN UP	TURN DOWN	BREAKOUT	BREAKDOWN
ADANIPTS	30MIN	64.29	0	1	0	0
APOLLOHOSP	30MIN	45.88	0	0	0	0
ASIANPAINT	30MIN	47.63	0	0	0	0
AXISBANK	30MIN	58.42	0	0	0	0

# Trade Status Checker

Many of you, our valued users asked us to provide a facility in all readymade trades' pages to alert if a trade is still open or is it closed. So we heard you and have added a feature that Notifies when a trade is closed.

So the moment you notice that a trade says closed- you must exit the trade.

# Connect a Broker Feature

Pick from 6 different brokers now inside NeoTrader and you get the one click trade buttons of one or all of them.

All you need to do is click on the “Connect Broker” Button on top of the page.

Hit the check box of you preferred broker and you will find that the one click button of the said broker will be automatically added to all readymade trades pages. The best part is, there is no limit to the number of brokers you can connect. We launched two new brokers this month and very soon we will be coming up with many more broker connections. You also have a facility to open a new account with your broker directly from NeoTrader itself.
