Cutting Edge Stock Market Analysis

OCTOBER 2023

Founder's Message

Hello

After several months of steady rise, the market is showing some pause. This is nothing unusual as markets always moves with ebbs and flows. The main element that we are noticing is that there is still no narrative in the market prompting one to sell holdings. Periodic in and out of FPIs shall continue but increasingly, we are finding that the impact on the market trends is becoming lesser. This is mainly owing to a lot of retail money coming into the market. That is the wall which shall defend the ongoing uptrend.

Technical signals always work well when the markets are in a clear trend. This reduces the noise level which tend to obfuscate or even confuse the signals. But Neotrader is well equipped to deal with these gyrations of the market and we are at work trying to make it even more robust in its features and signals with every new day.

Exciting new features are to be added very shortly to Neotrader and I am certain that members shall appreciate the new elements added. Our endeavor is to always think from the point of the user and see how to make the user interface more and more intuitive and easier to use. In that regard, we would welcome suggestions and inputs from our users that can help us build an even better product. Of course not all suggestions can be taken up at one go as development is a long drawn out affair. But every suggestion is welcome.

We are now active in the events spaces and this helps us to reach out to audiences outside of Mumbai. The most recent one was at Delhi and our team was present in good strength, showcasing Neotrader strength to all visitors. We plan to be there at every event across the country in the days ahead. Make sure to meet up with our people if an event comes to your town!

The festive season has begun. I wish all our members the best of times in the months ahead
Dr. C.K.Narayan.

THE ROLE OF THE TOTAL TREND

Over time I have interacted with many technical analysts. Some have learnt from me, some come to me to clarify certain things while some others come to learn more esoteric aspects. Many are seeking jobs or working at one or running a service. Some use it to trade and invest for themselves. They have varying degrees of success applying what they know and their situation in life can and is many times a reflection of how much success they have had with TA.

CHANGE IS THE ONLY CONSTANT IN THE MARKETS.

We would never put on a trade if we didn't think it would not be successful, isn't it? So, every trade begins with an expectation of success and therefore profits. Think like this often enough and then you will soon convince yourself that you are actually owed success. In life outside the markets, it many times works. Like, for e.g., you take up jobs that you think you can do well or efficiently. You pick challenges or take bets that you think can win. Most of the time, you are often in control of a lot of the process- the job, the challenge or the bet and hence can reasonably assess the outcome and you take the plunge when you feel reasonably confident.

What's New in NeoTrader?

RSI Breakouts & RSI Turn

We proudly present to you the brand new RSI breakout feature.

This will enable you to identify those stocks that are breaking above or below the bullish/bearish RSI levels. This is very useful to find out high momentum stocks and it can be seen across all time frames starting from 30min and going all the way to Monthly. You can find it on the RSI Trends Page.

We also have Programmed RSI Turn up and Turn Down Signals in the same page. This is particularly useful in identifying reversal trades.
