Cutting Edge Stock Market Analysis

NOVEMBER 2023

Volume 22

Founder's Message

The festive season is upon us and I trust that all our members had the best of the Navaratri festival. Soon Diwali shall be upon us and then that will be followed by Christmas and Chinese New year and so on. The whole world gets into a celebratory mood during these months. This is one of the reasons that Gold generally tends to do better in the second half of every year and it is often called the 'Love Trade'!

Equity markets have been doing well too and we all just love it too, when it is in a bullish mood. There was some slight shakiness to the sentiment but nothing that people could not handle so far. SIP has been increasing steadily and this is aiding the flow into domestic fund coffers and therefore these funds (indirectly the Retail) seems more than enough to take on the might of the FII selling- something not seen before.

This is very important because it is showing us a shift from the historical patterns of how the market behaves. These changes shall impact at every level of the market and not just as a statistic of FII fund flow. Analysis of stock movements at such times becomes a lot more difficult if approached with the age old methods. This is where Neotrader comes to the fore.

Not only does it capture the feel of the market but it is also technologically designed to capture shifts in the mood of the market quickly. More, Neotrader is always a work-in-progress product as I am continually engaged in improving its features all the time.

So, we are happy that you all are part of the ever growing Neotrader family and we wish you all the best of the festive season ahead.

THE CONSTANT NEED TO IMPROVE

Everyone in this world wants to improve. I am certain of that. If you are a thinking person then you automatically know that there are so many areas in your life that needs improvements. And, to an extent, you do go about doing something about it. Only those who are brain dead (but living) are the ones who don't think about improvements.

One of the prime requirements for improvement is to bring attention to the more important things. When you pay attention to whatever it is that needs to be improved, you start seeing more of it and then you find quickly where your deficiencies are and then can set about to correct them. ATTITUDE CREATES SOLUTIONS

Cut to a year ago or so. Someone comes to an advisor for help in managing their money better. They discuss their aspirations and their expectations and agree that they would have to be together for at least a three-year period to see some good results. The investment manager or research house were confident of creating some good returns to the client through their advice or stock picks. Client agrees, pays the fee and the association begins. Both parties decide that the approach needs to be leaning towards conservative (meaning no big risk to be taken) and returns around 20-25% should be considered as decent and desirable. Very happy. What's New in NeoTrader?

RSI Breakouts & RSI Turn

We proudly present to you the brand new RSI Support – Resistance feature

This is in addition to all the new features of RSI that we have launched beefing up this page significantly. You can now automatically get a ready list of stocks that are either facing Resistance at 60 and are bearish – or taking support at 60 and bouncing back (read Range shift? – Similarly it also shows the bullish stocks taking support at 40 and so on.

This is an extremely powerful signal and we are very proud to be the only ones in India to offer it in such a visual and user-friendly manner. You can find it on the RSI Trends Page on the second tab.
