# Founder's Message

It is a cheery time in the markets as indices hit all time highs. Nothing like a strong bull market to get the sentiment juices flowing! The main event was of course the decisive victory of the BJP at the state elections and this can be a very big thing for the Lok Sabha elections for 2024. Continuity of policy is what every investor looks for and with the likelihood of BJP govt continuing at the center, the FII seem to be making a comeback and their figures have turned positive after a few months of selling.

Therefore, it will be prudent for every one involved with the market to stay invested and in the market. Given that bullish trends shall prevail- of course, with periodic corrections- it shall also provide for wonderful opportunities to profit from both trading and investing.

Neotrader is an always-work-in-progress program where I seek to introduce better and better features so as to make the job of any trader and investor easier.

The focus of Neotrader shall always remain on the M.E.T model, meaning Money, Effort and Time.. Our goal is to increase your Money, with lesser Effort by you and in lesser Time!

We shall soon be coming out with some major changes in Neotrader that will only help to make the software even better than what it is. Stay tuned for it.

In this issue you will of course be reading in detail about our successful participation in the FinBridge event held in New Delhi. Our outreach program is in full swing and we hope to participate in every such program so as to come in touch with people from all over India.

The festive times has taken a pause but as we all know, they continue for several months more. What can be better than to have the markets hit all time highs and then continue to do so further! Until we connect again, I wish you all the very best

## BIG WINS DESIRED BUT NOT OBTAINED

In the market, everyone dreams of winning big. Most of the time, this happens because we see these big headlines in the papers or on website saying: “This small-cap stocks gave 1300% in one year” or something along those lines. And you read these quite often. Because some obscure stock keeps doing this periodically. Never mind the fact that many of them are of very dubious merit!

But this engenders a feeling that is possible to earn that kind of return. And when you read it a few times, it kind of becomes a desire in your mind- if only I could find such stocks! Sigh.

The reality is that most people’s books of winners but those winners are offset by one or two big losers. It doesn’t matter whether this is a trade book or an investment book- the story is the same.

# EVEN AMATEURS CAN WIN IN THE MARKET

Most of us are amateur traders and investors. Even though we like to think otherwise about ourselves! A professional in any field is one who earns his living from that line of work. While most people in the market may like to think that they earn (their second income?) from the market, the fact remains that they are amateurs.

One of the reasons why people don't like to call themselves or be labelled as amateurs is owing to the slightly derogatory connotation associated with that word. When somebody wants to belittle another's work or show themselves to be superior to the other, there is a tendency to label the other's work as being that of an amateur. But this is not really the truth. The word amateur comes from the Latin word 'amare', which means to love. So, really speaking, an amateur is one who is doing something for the love of it! Professional is then one who is doing something for earning from it (and possibly loves doing it also). Seen from that angle, how can any derogatory connotation be ever applied at being called an amateur?
