

NeoTrader Newsletter Vol #5

February 2022

To the NeoTrader Family,

Hi there

This is Dr CK Narayan, reaching out to you once again from the offices of Neotrader, India's No 1 trading and analysis software. I just felt sharing some new developments in our business with you all.

Recently I published a blog entitled *Thinking your way to success in the market*. This blog is posted on my website, www.cknarayan.com and you can visit there to

read it. Oh, I didn't tell you earlier about my new website! I just launched it in spite of being over 40 years in the market! Talk about being late to a party!

The reason it took so long was that I was engaged in various activities and anyway in touch with most of the people who interact with me. It was either through television (ET Now, where I did an almost 10-year stint) or through products from my companies (Chart advise, Growth Avenues, Neotrader), my newsletters or through the some website or digital channel etc. But Covid intervened to change a lot of those. Hence, I decided to channelise all my efforts, communications and offerings through a single point- my website, www.cknarayan.com.

Do visit there to get an idea of all the offerings and more information of what is in store. There is going to be plenty! What you are seeing now is just version 1 of the new website. For starters, I am coming with a regular column on the website where I shall post my views on various matters (pertaining to the market, mostly). That should be up very soon. So, watch out for that. I plan to have a pre-market commentary in there which should set the tone for the day and ahead.

The site will also have my videos and blogs and I plan to make plenty of those too. These are the days of video but I do love writing and hence am going to keep that up too. If you love a non-stock oriented write up that deal with how we can look at markets to improve our productivity and results, then my blogs should be the ones to read. I promise to keep them coming at fair frequency.

You will also get info about my favourite Neotrader, a labour of love and effort, designed to make two important elements available to the user- save time and save energy. Those are two things at a premium in this world and hence I directed my efforts at saving both of those scarce elements. Alongside, it gives you top-notch outputs of ready trades and processed data for your own analysis. If you haven't tried Neotrader yet, I suggest you do so after reading this mail. If you use it well, you're trading and investing life is set to change dramatically for the better.

There's lots of activity happening at our new office, reopened after nearly 2 years of the pandemic. I have upped the quotient on client service and made it the top priority of our business. Whatever way you choose to engage with us, you shall be assured of unparalleled service. If you get the time, do drop in for a visit to our office at Chembur. We would be delighted to have you there.

I mentioned a blog that I wrote last week. Well, I just wrote a follow up to

that one entitled *Find the time to think* and this should be up on the site by the time you read this. Do check out both of them because I feel it is very important for traders in particular to develop their faculty of thinking.

We have upped the output on our video recordings and we now have new videos almost every few days that are made by me, Raja, Aditya or Shabbir on various aspects. Make sure to head out to our YouTube channel *Neo Trader* and make sure to subscribe so that you don't miss any of these value- adding material.

We have just begun. Lots of more exciting features ahead. Stay tuned.

Dr CK Narayan

Market Outlook – Nifty & Nifty Bank.

Trend shows some revival ...Can they continue??

Post its substantial decline since the budget the markets are attempting recovery as we head towards the end of this fiscal year. While the hesitant bullish charge continues to make its way upwards. Certain stocks are showing some sterling recovery either due to its oversold conditions or due to some newfound value proposition that is being discovered. The trends continue to exhibit some strength and the markets are still not ready to give up. An interesting time to watch out for in the markets.

Nifty(Fut)

The Index has been under pressure post the budget. The corrections in the market are an opportunity to buy but seldom do we take the opportunity. The fear of the market falling further keeps the retail at bay. The intermediate trend of the market is very strong and hence these dips in the market are an opportunity to buy. The 31700 and 16700 are two important zones on Bank Nifty and Nifty respectively and these zones need to be conquered by the bears to intensify further bearishness. But clearly the trend continues to be weak and hence these dips in the market are an opportunity to buy. Better than expected numbers in the US has put some pressure on the US market as the possibility of lowering the interest rates has come down. But technically the market is on a strong footing and hence the negative news will come and fade away.

The regain of the extended trend line from the highs is very positive. The Index consolidated for a few days on the trend line and then moved up. The divergence seen on the index suggests that the trends are intending to move higher. However the chart indicates that the median line is continuing to be a problem for the prices. The closing above the median line does augur well and we should look at some continued trends in the coming days. The trend has revived once again and the probability of the Index moving up from here is very high. Since the RSI is in the revival

mode we can maintain the upper bounds towards 16600 as the next level of resistance the Index will face.

What's New in NeoTrader

Updated Watch list Feature

We proudly present to you an update about one of the most efficient pages of Neotrader – *Watch list Page!*

The following steps will explain the new feature:

- Go to *Heatmap* and select the stock you want to add in your existing or new watch list with the help of the drop down dialogue.
- Next go to the *Watch list page*.

Heatmap

ONGC ▶ 12.68 %	HINDALCO ▶ 6.20 %	BALRAMCHIN ▶ 6.10 %	ZEEL ▶ 5.60 %	GAIL ▶ 4.31 %	COALINDIA ▶ 4.20 %	BHARTIARTL ▶ 3.52 %

Intraday Trades Results

*** Symbols marked in blue with 3 stars denote super curated trades with higher levels of filtration.

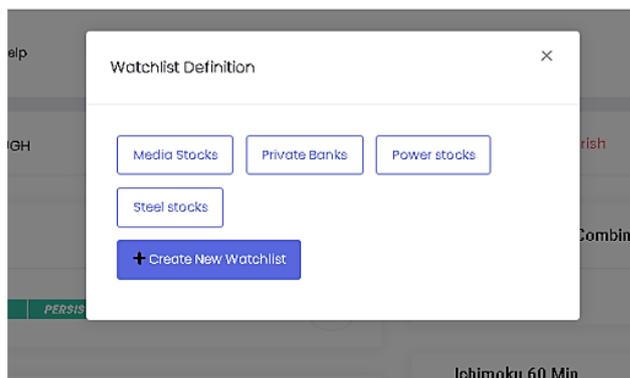

Search... Add to Watchlist Add to MyTrades

- ❑ Another new feature is - Delete *Watchlist*. This lets you delete any watchlist that you had created in the past, decluttering your research.

Another empowering update that will help you in your research, is the bulk addition of stocks to your watchlist!

You can use this feature to analyze, be it either on week-end bases or on day-end bases so that you are well prepared for the next trading session.

If you have to do is go to the page you follow, For example, *Experts Alerts*, and click *the plus sign*. This feature also applies to all the other pages – *Camarilla, Candlestick Dashboard, Ichimoku Dashboard, Pivots View...and so on!*

Neotrader software is splendid. It gives me a clear picture of the markets and allows me to trade with confidence. The major input is expert alerts page and pivots page combined with the dashboard view which will do wonders to our trade. Thanks to you Neotrader team for making my job easier.
