Founder's Message

The financial year ended and a new one starts. As ever, people are prone to making Resolutions at various starting points. So, let's make one for this FY to become profitable in our trading and investing.

For a Resolution to work out, you need to focus on it all through the year. And the only way to do that is to have a process. Fortunately, we do have a process-creating tool with us in the form of Neotrader. There are, as many of you are aware, several pages through which one can create a process for trading and investing. This is, of course, in addition to the readymade trades that are available.

What is needed however, is to bring some faith into the matter and this will go across several areas, such as
Faith in the efficacy of the software
Faith in its ability to deliver profitable trades to you
Faith in yourself that you can create systems out of the pre analysed data

Faith in the NeoTrader team to help you achieve success. Etc.

NeoTrader can deliver on all these fronts (and more) but you need to stick with it. Faith is a belief in what you know not now so that you can manifest it in your life through time. Take the efforts to 'know' our product and the time required for your belief to turn into reality will be cut short dramatically. Our team is standing by all through the year to help you maintain your faith and deepen your belief about the success with NeoTrader.

Let us all, therefore, RESOLVE to make NeoTrader the main tool to use so that we can all succeed this year. Concentrate on this ONE aspect and I assure you that matters will be dramatically better across the coming financial year.

Wishing you the best for success in the new FY.
Dr CKN.

LOOK AT THE PAST IF YOU WISH TO SUCCEED

2023 was born recently and already the third month is about to get over! The financial year is about to come to an end. All of us, doubtless, made plans at the start of 2022, made them again at start of 2023 and we also decided so many things that will happen in FY 23.

CHANGE IS THE ONLY CONSTANT IN THE MARKETS.

We would never put on a trade if we didn't think it would not be successful, isn't it? So, every trade begins with an expectation of success and therefore profits. Think like this often enough and then you will soon convince yourself that you are actually owed success....

ACHIEVING THE DESIRED OUTCOME IN TRADING.

One of the biggest reasons for lack of success in the market is the mismatch between what we want to achieve and what we are doing in the market. And here, I mean the method that is employed by people in their attempt to trade or invest in the market. ...

Strategy Spotlight

T1 in NeoTrader – which is the best target T1, T2, Or T3?

When you take a trade in Inside neotrader, you are presented with three target T1 , T2 and T3 a common question we get asked in many of our webinars and Q&A sessions is “How do I pick what is the right target for me? “ and that is what we are going to cover in this article.

In this article, I am going to specifically going to talk about intraday trading and the trades that come on the intraday page of neotrader.

What type of trader should go for T1?

There are broadly 3 times of traders who are doing intraday trades first category are full time traders, basically all of those people who have time to sit in front of the screen the full day, we will categorize them as “Normal traders”

The second category is “Scalpers”- these are fast traders – basically someone who is looking to capture quick profits in a very short period of time.

The third category is “BTST traders”, who like to take overnight positions.

In the below table, we have summarize how each category must plan the trades.

Type	Action to be taken at T1	Stop loss criteria
Normal Trader	Move SL to Entry price	Use System based Stop loss level
Scalper	Book Profit @ T1	Keep a time stop of 15-20 mins
BTST Trader	Move SL to Entry price	Exit by 11AM on the next day

So explaining in simple terms we have taken an example from the intraday page.

STRATEGY	TIMEPLAY	RECENT VALUE	SYMBOL	SUMMARY 30M:1H:D:W	ALERT	SIGNAL DT ↓	STATUS	ENTRY	T1	T2	T3
BTST-1	OVERNIGHT	145.3	ASHOKLEY	●	LONG	2023-02-28 15:00:24	ACTIVE	145.2	146.4	147.4	148.8
MOMENTUM-1	INTRADAY	1732	ACC	●●●●●	LONG	2023-02-28 11:16:53	T2 MET	1737.2	1745.1	1758.1	1777.8
BREAKOUT-1	INTRADAY	905.8	CIPLA ***	●	SHORT	2023-02-28 11:05:05	T2 MET	927.1	920.1	913.1	903.9

So in the case of ACC,

The entry price is 1737 and T1 is 1745 –

So a scalper's job is simple, just enter the trade as suggested and then exit at T1 (You can keep a time buffer of 20-30 mins and if the trade doesn't work in that period you exit)

The Normal traders, move the stop loss to the Entry price which is 1737. Wait till the end of the day's trade for higher targets and then reach

Let's take the case of the BTST trade now.

Ashokley entry price is 145.2 – This trade came at 3PM so on the same day the trade will be taken. Assume its 9.30 AM On the next day if T1 is met with a gap up open, the stop loss should be moved to the entry price of 145.2 – and you can wait till 11AM for T2 and T3. At 11 AM it's advisable to book profits and exit the trade.

So to conclude, the target you pick needs to be customized based on your approach. The important point is to focus on probabilities.

Top Trades in March 2023

The following shows short and long trades profit.

Short Trades : Short refers to selling a security first and buying it back later, with the anticipation that the price will drop and a profit can be made

Long Trades : Long refers to buying a security first and selling it later, with the anticipation that the price will increase and a profit can be made
