## REACH FOR THE REWARDS

One of the more perplexing problems for market players is to know when a move has gone far enough. This is true whether prices are going down or up.

For eg. when the market was going down back in March, everyone was steadily turning bearish. Since then the market has been moving higher and now, steadily, everyone is growing bullish.

Nothing lasts forever. We all know that. Trends are the same. They don't go on endlessly. But emotions about the trend are quite different. When markets are falling or rising, it seems like there shall be no end. This is what leads to emotions of extreme Fear or Greed. And those are the points where the markets make a turn.

Our job as advisors and consultants in the market is to be able to pinpoint such points to our clients. We do that through various avenues.

For those with no time, no ability but with resources, we help manage their accounts and execution. For those with time but no knowledge, we provide our advisory

advisory services through products such as Neotrader and CFO Gains. And for those that have time and are willing to make some effort, we provide Training programs. Thus, you will note that at Neotrader, we have you completely covered- for whatever you may need.

There is some offering or the other for everyone. So I call out to all of you to try all our offerings. Who knows what may fit your requirement best?

Left to me, I would recommend Neotrader software. It has something for everyone. But for a serious user, it has everything too, for that person, as you can bundle many of our other services with it.

I will not give up my effort to make Neotrader the best trading and analysis companion in the world. I urge you to take that ride with us so as to benefit immensely. The market is ready to reward. We are ready to help reach out for those rewards. Question is, are you?

Cheers

# Strategy Spotlight – Investment Ideas

NeoTrader is loved by all as a number one trading assistant but we also enable investments thru NeoTrader.

One really unique Feature of NeoTrader is Short term investment ideas that come every week. These trades are of the Buy and hold variety and can be held for up-to 12 weeks. In most cases the targets are achieved much before that as well.

This is perfect for those users who want to add an element of momentum investing into their portfolio mix. We use a highly filtered technical analysis based strategy that captures the higher time frame trends on the weekly chart in a stock that are ready to give a strong Up move.

The best thing about this, is that it performs.... It has performed to perfection.

Looking at the closed trades from the past 3 Months - we can see that every trade has hit the target.
