Founder's Message

Hello

The saying of the market is that more money has been lost waiting for a reaction than in the reaction itself! This aptly sums the current situation of the market where scores of people have been suffering from fear of heights -with the Nifty and Sensex at lofty levels- and have been waiting to channel their money into the market. Problem for them is that they have no solution to this self-created problem!

Not so with our NeoTrader subscribers! If there is one thing that NeoTrader can do, it is to lock into the ongoing trend with precision and being able to shift gears smoothly and swiftly when the trend changes. Thus, whether you are day trading or multi day trading or short term investing, NeoTrader will not allow you to stand helplessly by the sidelines, hoping and praying that you will be let in!

Main point is, with NeoTrader, **YOU ARE IN CONTROL** of what you can and will do in the market.

That is an important element. If you look around in your own life, you will realize that much of your progress has been achieved through a process of Control.

Your parents controlled your behavior and you had to stay within those boundaries. In your academic years, you took control of your studies and cleared the exam. In sports, you controlled the way how you played and you won. In your employment career, you took control of your job and did it well and reaped the reward of bonuses and promotions. In business you took control of costs and selling prices and supply chains etc. and you made progress in business.

Thus, everywhere you look, the process of control helps you to stay in shape and be ready for whatever area it is that you are engaging in. Why should it be any different for the market? Unfortunately, there is nothing to control in the market- it is an amorphous collection of people whom you don't even know. However, you can definitely control how you will position yourself, how you will act and in what way you will react etc.

Therein lies success in the market. And, Neotrader is the best companion to help you achieve it.

ATTITUDE CREATES SOLUTIONS

Cut to a year ago or so. Someone comes to an advisor for help in managing their money better. They discuss their aspirations and their expectations and agree that they would have to be together for at least a three-year period to see some good results. The investment manager or research house were confident of creating some good returns to the client through their advice or stock picks. Client agrees, pays the fee and the association begins. Both parties decide that the approach needs to be leaning towards conservative (meaning no big risk to be taken) and returns around 20-25% should be considered as decent and desirable. Very happy.

The Grass Is Always Greener On The Other Side

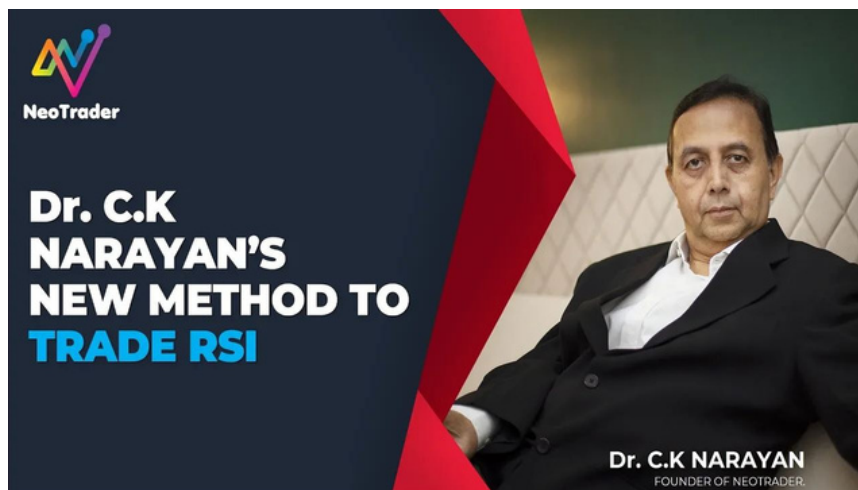

This is one of the phrases that we are all familiar with. It refers to a feeling that we have that something that is not with us is somehow always better than the one we have. That may be factual or fiction but all of us carry this feeling about various things in life. It is also found in dollops in the market. The stock that we own is always dog and it is only the one we don't have that keeps running! Worse, we had a choice between the two at the time of buying and we chose one but it was the other which ran! Why is this such a universal experience? Can something be done about it?
